Must Read Articles

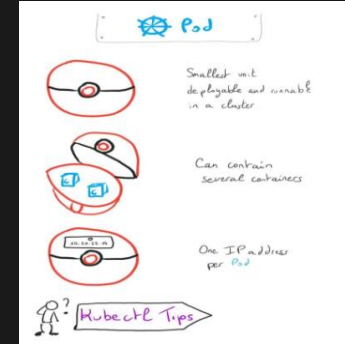

Best practices for REST API design

In this article, we'll look at how to design REST APIs to be easy to understand for anyone consuming them, future-proof, and secure and fast since they serve data to clients that may be confidential. Do read the discussion in the comments!

The 2020 Developer Survey results are here!

Depending on how you count it, this is the 10th year Stack Overflow has been conducting its annual developer survey. The results of this survey reflect the opinions and experiences of nearly 65,000 developers

Understanding Kubernetes

Understanding Kubernetes can be difficult or time-consuming. In order to spread knowledges about Cloud technologies I started to create sketchnotes about Kubernetes. I think it could be a good way, more visual, to explain Kubernetes (and others technologies).

Discussions, Upcoming Tech Conference & GitHub repo's

API's : explain like I'm 5

Every time I think I understand what an api is and how to interact with it, someone talk about it in a way that makes me feel like I misunderstood what it is. Can some explain it to me very basic and simply?

UI5con

Community conference around the UI5 framework - July 9,10. It is recommended to watch previous UI5con video's with tons of information about SAPUI5 to learn from.

You don't know JS

A book series on JavaScript. @YDKJS on twitter. Must must read for all developers.

Podcast, Videos & Livestream

Episode 39: SAP CAP and the first community conference re>≡CAP

In this episode Martin (@cyclingfisch) chatted with Volker Buzek (@vobu), Gregor Wolf (@wolf_gregor) and Christian Braukmüller (@cbasis) about the SAP Cloud Application Programming Model (CAP) and the first virtual community conference about CAP which is called re>≡CAP and took place on May 15th.

Typescript course for beginners - 2020

Typescript is one the top 5 most loved & wanted languages out there, more than Javascript!! - Stackoverflow survey. So why don't you give a try to this beautiful language by checking out this video, which has all that is needed for a beginner to start.

Florin Pop- Coding tutorial, challenges and more

I love to create Coding Tutorials and to Code Live, so you'll see a lot of those on this channel! Together we're going to learn a lot about web development (HTML, CSS, JavaScript, ReactJS, NodeJS, Animations, Components, APIs and all the cool stuff 😊). I also love challenges.

Productivity

A 3-Minute Hack for Focus You've Probably Never Heard Of

In 2016 a smart UX Designer shared a tip with me. I asked her, "How did you sit down for four hours straight and finish that PowerPoint deck?" Her answer was weird: "Binaural Beats." "What is that," I said. For the next few years I ignored her advice and went back to trying to be creative in complete silence without distractions. It was torture. Achieving perfect silence is near impossible.

Thanks for subscribing and reading!😊
