Inside this Issue

- PG.1 – Must Read Articles
- PG.2 – Interesting Discussions & Upcoming Tech Conferences
- PG.3 – Podcast, Videos & Livestreams
- PG.4 – Interesting Github repo's & Productivity

Must Read Articles

What the heck is Deno?

If you know about NodeJS then you should be aware that creator of NodeJS Ryan Dahl new project is Deno. If you are familiar with Node.js, the popular server-side JavaScript ecosystem, then Deno is just like Node. Except deeply improved in many ways.

Authorization in SAP UI5 apps using BOPF and CDS

If you are aware about BOPF which has authorization class already associated with it. We can leverage this BOPF authorization class for adding any authorizations to our UI5 app. This can be role based authorization, user name based authorization, authorization using an authorization object, and many more .

Pitfalls of async-await in array loops

Using async/await while looping through arrays in Javascript loop seems simple, but there's some non-intuitive behavior to look out for when combining the two. Learn about them more in the above article

Interesting Discussion's & Upcoming Tech Conferences

Discussions

Why and how you should migrate from Visual Studio Code to VSCodium
