Must Read Articles

Building Beautiful Command Line Interfaces with Python

Before we dive in building the command line application, let's take a quick peek at Command Line. Command Line programs have been with us since the creation of computer programs and are built on commands. A command line program is a program that operates from the command line or from a shell.

Evolution of ABAP platform

As technical architect, I am often asked about the latest news in the technical area of SAP S/4HANA. In these 3 blog posts I would like to review the main changes and innovations that SAP have introduced in the last years to explain the evolution SAP Netweaver platform towards the new ABAP platform from a technical perspective.

A guide to setting up your Open Source Program Office (OSPO) for success

Companies create Open Source Program Offices (OSPO) to manage their relationship with the open source ecosystems they depend on. By understanding the company's open source ecosystem, an OSPO is able to maximize the company's return on investment and reduce the risks of consuming, contributing to, and releasing open source software. Additionally, since the company depends on its open source ecosystem, ensuring its health and sustainability shall ensure the company's health, sustainable growth, and evolution

Upcoming Tech Conferences, Interesting Podcasts & GitHub repo's

ASUGFORWARD ONLINE

In today's rapidly changing business environment, learning and sharing has never been more important.

ASUGFORWARD is designed to do just that—move us forward. ASUGFORWARD is a focused week of digital content that will help you and your organization navigate our new reality. Each day will offer timely thought leadership mixed with practical lessons for SAP customers with the guidance and advice of actual SAP customers.

clean-code-javascript

Do you write JavaScript code or learning it currently? If yes, then don't miss to check this gitrepo which helps you to write a clean, better and usable code.

Lets understand HTTP

HTTP is a protocol that allows browsers and web applications to communicate across the Internet. Everyone knows that HTTP is doing some important work, because "HTTP" is at the beginning of most URLs that you enter into your browser. You might be familiar with the request/response model, and HTTP request methods such as GET, PUT, and POST. But unless you have had a reason to learn more about the details of HTTP, you probably don't know much more than that

Interesting Videos, Courses, & Livestream

SAP IRPA Course1 Course2 Course3

Kickstart your SAP RPA learning & development by enrolling to the free RPA courses offered by openSAP

openSAP Micro Learning for S/4HANA

Check out the new micro learning series for S/4HANA started by openSAP team. This series has short videos for both Functional and Technical. So don't wait and check them out!

freeCodeCamp.org - Must Subscribe

We're an open source community of busy people who learn to code and build projects for nonprofits. They stream on number of topics right from Javascript to Python to Machine learning to what not.

Productivity

Top 12 Things That Destroy Developer Productivity

In 2016 a smart UX Designer shared a tip with me. I asked her, "How did you sit down for four hours straight and finish that PowerPoint deck?" Her answer was weird: "Binaural Beats." "What is that," I said. For the next few years I ignored her advice and went back to trying to be creative in complete silence without distractions. It was torture. Achieving perfect silence is near impossible.
