ES6 Crash Course

Want to write javascript like a sane person? 🐦 Here's a mini crash course just for you 🐦 ES6+ JavaScript can actually be FUN to write!

What the heck is an event loop in Javascript?

Oh boi the event loop. It's one of those things that every JavaScript developer has to deal with in one way or another, but it can be a bit confusing to understand at first. I'm a visual learner so I thought I'd try to help you by explaining it in a visual way through low-res gifs because it's 2019 and gifs are somehow still pixelated and blurry.

Goodbye Object oriented programming

*I've been programming in Object Oriented languages for decades. The first OO language I used was C++ and then Smalltalk and finally .NET and Java. I couldn't contain my excitement at the thought of mapping my real-world objects into their Classes and expected the whole world to fall neatly into place. I **couldn't have been more wrong.***

Tech Conferences and Courses

reCAP (un)conference on 15th May

Nowadays, most Techs in SAPverse have certainly heard of CAP, the Cloud Application Programming Model, and its' sibling RAP. Both are the go-to programming models for SAP cloud-centric applications. Momentum and pace on CAP have been picking up this year, not the least due to the introduction of the CAP community on SAP mentors and some excellent articles on the subject. Then a funny chat on Slack happened on having a nerd cruise for CAP. And this lead to a community-driven initiative for organizing an actual event recap

On-going Course SAP Cloud Application Programming Model

Join this free online course to learn how to build applications with SAP Cloud Application Programming Model, which guides developers with best practices, as well as adopted open-source and SAP tools and technologies

Hands-on SAP Dev with qmacro aka DJ Adams

DJ lives in Manchester and works on developer outreach and advocacy in SAP's Developer Relations team. He's been hacking on SAP enterprise software for more than three decades, and has a strong connection to the Open Source community too. This is the new home for the "Hands-on SAP Dev with qmacro" series too.

Podcast, Videos & Livestream

Bluebeard's Tech Talk - @qmacro (DJ Adams) and Authorization & Authentication in Cloud Foundry

This week we chat with qmacro, a.k.a. DJ Adams, about how and why a developer on the SAP Cloud Platform should consider implementing OAauth 2.0 in a Cloud Foundry runtime. Lots of great technical detail and lots of follow up items!

Creating a simple VSCode Extension

In this video we will explore what goes into creating a simple Visual Studio Code Extension. We will create a simple Bootstrap Snippet extension based on an extension that is already in the marketplace

Upcoming Course SAP Fiori

Join this free online course to learn what the SAP Fiori design system is and how to design and develop your own intuitive applications.

Productivity Hacks

Very important and must know productivity hacks by Vijay Vijaysankar

I am always looking to find one more way of tuning up my productivity . Off late a lot of people have started asking me of my work habits , and I thought maybe if I jot down mine – maybe it will prompt a few more of you to chime in and we all gain a new trick or two

Virtual Learning hacks & Tips for learning remote/virtual from Thomas Jenewein

Many people try to make the best out of this situation and learn and acquire new skills. Others just need to work and learn remote and virtual now for business continuity. To support everyone we collected the below tips & helpful resources and hope they help you.

Thanks for subscribing and reading!☺
